PRICING ANNOUNCEMENT

TRACPLUS GLOBAL ANNOUNCES COST SAVINGS FOR CUSTOMERS

New Zealand company TracPlus Global Ltd has announced key changes to their pricing model that will deliver significant savings to existing and new TracPlus customers alike.

“At a time when our customers are facing continually increasing costs for all aspects of their operations, it is nice to be able to deliver a little relief by announcing a price decrease” said TracPlus CEO, Chris Hinch.

“As TracPlus has been taken on board by an ever increasing number of aviation and maritime operators around the world, we have improved our purchasing power, and are pleased to pass those savings directly onto our customers.”

From June 1 2008, all monthly and airtime charges for the global tracking service will be charged to customers in US\$ and converted to local currency at time of invoicing. This will allow customers to see exactly how their tracking costs are determined. At the same time, per message costs for Iridium and Inmarsat networks have been significantly reduced.

“For the majority of our customers, this will mean a 35% reduction in airtime charges, and even greater savings for users of our new Iridium SBD based terminals. Like our ongoing investment in product development, this pricing review reflects our total commitment to deliver the best, most reliable and cost effective global tracking solution possible.”

Other changes to the pricing model and terms and conditions are available on the TracPlus Global website at www.tracplus.com

About TracPlus Global

TracPlus is an innovative system that provides global tracking of assets in all transport environments, be it aviation, maritime or land – all within a single system. TracPlus seamlessly integrates a wide-range of different tracking hardware, communications networks and software packages, giving operators, agencies and authorities alike vastly improved situational awareness.

TracPlus is used in twelve countries as well as Antarctica, and is used by St John Ambulance Emergency Coordination Centres (ECC), Rescue Coordination Centre of New Zealand (RCCNZ), New York Air National Guard and Coastguard New Zealand.
